

Strategy & Objective

The Dividend Growth Portfolio is a diversified portfolio (not a fund) of global equities, which we believe to be well positioned to outperform the wider equity market over the longer term. The portfolio has a bias towards developed market, large capitalisation stocks.

Portfolio Performance (GBP)^{1,2}

Long Term Returns	Dividend Growth Portfolio	MSCI World	Relative Return
Since Inception	81.3%	68.3%	13.0%
3 Year	50.4%	39.0%	11.4%
1 Year	26.1%	17.6%	8.5%

Short Term Returns	Dividend Growth Portfolio	MSCI World	Relative Return
YTD	21.3%	16.9%	4.4%
3 Months	16.5%	14.6%	1.9%
1 Month	3.7%	4.5%	-0.8%

Market Commentary

The S&P 500 registered new highs over July, ending the month up 3.7%. Meanwhile, the US earnings reporting season entered full swing and sentiment was boosted by abundant surprises to the upside. In Europe, like their American counterparts, the ECB opted to continue their accommodative monetary policy stance. The STOXX 50 was up 4.5%. The uncertain ramifications of Brexit continue to weigh heavy in the minds of central bankers globally. Hopes of further stimulus from the Bank of Japan were dashed, as the bank held interest rates at -0.1% and offered only modest additional measures. After the announcement, the Yen soared against the US dollar. Following a failed military coup in Turkey, the BIST 100 fell -1.8%. President Erdogan has responded forcibly with a crackdown, purging thousands of government officials, and has imposed a three-month state of emergency.

Key Contributors to Return

Microsoft returned 10.8% over July as recent results suggest it is continuing to transform itself in a world that prioritises cloud computing and mobile technology. The 108% growth in its cloud platform shows it is starting to catch up with Amazon Web Services, while declining revenues from its Windows products have been arrested. Having pioneered the development of Macau's Cotai region, Las Vegas Sands is primed to benefit from the growth of mass market revenues. The company is also markedly more efficient, enjoying 30% more of the market revenue than their capacity would imply. The stock returned 16.5%.

Key Detractors from Return

Though initial signs suggest Chubb's merger has been successful, earnings per share fell by 3% compared to the first half of last year. That said, the company expects merger-related savings to reach \$750m annually by then end of 2018. The company fell -4.2%. Statoil fell -8.1% as the company reported an unexpected loss amid lower crude prices and taxes on unprofitable international operations. However, the company has continued to invest in new sites, seizing on lower asset valuations amid a price slump, for example a \$2.5bn offshore oil block in Brazil.

Investment Philosophy

Credo's investment philosophy is based on the following tenets:

- Wealth is preserved and created by following a long-term, low-turnover strategy.
- We believe in a value-based approach to investing, given that the price which is paid when investing is one of the very few things in financial markets that investors can actually control.
- We do not define risk in terms of quantitative metrics, but simply as the potential to lose clients' money; accordingly, our approach to investing can be described as a relatively conservative one, focusing first and foremost on capital preservation.
- Yield is an important consideration across all asset classes.
- Transaction costs have the potential to erode investment returns quickly; based on this, we not only follow a low-turnover approach, but we also apply our minds when considering transaction size.
- We aim to identify matters of strategic importance when considering investments, rather than focusing on daily news-flow in financial markets.

(1) Performance figures are based on a notional portfolio, denominated in pound sterling, designed to track the holdings of the Credo Dividend Growth Portfolio. Portfolio incorporates all additions and removals. Portfolio may not be fully invested at a point in time and therefore can hold a portion of assets in cash. Performance is calculated before any fees (which can vary depending on the level of service) but includes gross dividends, reinvested. Following additions or removals, each holding is rebalanced to a 5% weighting.
