- The Fund will have a particular focus on securities of companies that are listed or traded on recognised, developed markets on a global basis.
- Business sectors that the Investment Manager may invest in include, but are not limited to, financial, consumer discretionary, healthcare, technology, consumer staples, communications, utilities, industrials, and businesses involved in the discovery, development and processing of raw materials.

Risk and reward profile

◀ Lower Risk

Typically lower rewards

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Class B Shares above appear as a "5" on the scale. This is because the Fund by its nature invests in a mixture of investments. The value of these investments may vary more widely than others.

• The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

• Equity Investments Risk - Investing in equity shares means you are taking a stake in the performance of that company, participating in the profits it generates by way of dividends and any increase in its value by way of a rise

in its share price. If the company fails, however, all your investment may be lost with it.

• Market Volatility Risk - Equities invested in by a fund may involve substantial risks and may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses. In addition, relatively small companies in which a fund may invest may lack management depth or the ability to generate internally, or obtain externally, the funds necessary for growth and companies with new products or services could sustain significant losses if projected markets do not materialise.

• Counterparty Risk—The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

• Liquidity Risk—Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

• Management Risk—Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.

• Exchange Rate Risk—Fluctuations in exchange rates may cause the value of your investment to rise or fall.
