Introduction

- Following the success of the Guernsey registered Credo Global Equity Fund, which launched in March 2016, we have launched the Credo ICAV (Irish Collective Asset-management Vehicle), which is an umbrella fund with segregated liability between sub-funds domiciled in Ireland
- The Credo ICAV is a **UCITS** fund which includes the following sub-funds:
 - *Credo Global Equity Fund*
 - *Credo Dynamic Fund*
 - *Credo Growth Fund*

Advantages

- Fund structure facilitates **tactical management** e.g. the potential to add to or trim an exposure, as opposed to singular investment / disinvestment decisions, as well as the possibility of differential position sizing, which can be seen as a more accurate expression of Credo's investment views
- Greater **diversification** given increased number of securities held
- **Potential tax benefits** relating to holding investments in an Irish UCITS fund instead of segregated onshore (UK) portfolios
- **Liquidity:** daily dealing funds
- **Risk management:** for example restrictions on leverage and derivatives
- **Transparency:** variety of fund documents and disclosures
- **Reputable service providers:** which includes the Management Company, Depositary and Auditor

Fund Background

- Follows the success of the Credo Best Ideas Portfolio (BIP) and the Dividend Growth Portfolio (DGP) in providing global equity exposure
- Uses a similar investment methodology as that employed for the BIP and DGP
- Combines the “best of both worlds” as a substantial portion of it will overlap with existing stocks included in the BIP and DGP
- In addition, includes some of the stocks of the Credo Special Opportunities Portfolio (SOP), which consists of a limited number of equities with a somewhat higher risk / reward profile, as compared to the BIP and DGP
