Risk and Reward Profile

The indicator is based on the available history of the returns of the Sub-Fund completed with the history of the returns of a representative portfolio. The risk category shown is not guaranteed and may change over the time. A risk indicator of "1" does not mean that the investment is "risk free". Historical data used to calculate this indicator may not be a reliable indication of the future risk profile.

The Sub-Fund is placed in this category as most of its assets will be permanently exposed to international equities.

Diversified exposure to equity markets, interest rate risk, credit risk and currency risk explains this Sub-Fund's classification in this category.

The lowest category does not mean a risk free investment.

For more information on risks, please refer to the Prospectus of the Sub-Fund.

The Sub-Fund is rated 6 due to the nature of its investments which include the risks listed below.

These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

- **Equity Investments Risk:** Investing in equity shares means you are taking a stake in the performance of that company, participating in the profits it generates by way of dividends and any increase in its value by way of a rise in its share price. If the company fails, however, all your investment may be lost with it. The share price does not reflect a company's actual value, rather it is the stock market's view of a company's future earnings and growth potential, coupled with the level of demand for it, which drives the share price higher or lower as the case may be.

- **Credit Risk and Fixed Interest Securities:** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security will fall in the event of the default or reduced credit rating of the issuer.

- **Currency Risk:** The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

- **Counterparty Risk:** The Sub-Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Sub-Fund.

- **Liquidity Risk:** Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

For full details of the Sub-Fund's risks please see the 'Risk Factors' section of the Sub-Fund's Prospectus, which is available from the Administrator at Credo ICAV, Société Générale Securities Services, SGSS (Ireland) Limited, 3rd floor, IFSC House, IFSC, IE 1 Dublin or, during normal business hours on +35 316 750300.
