

Core Strategy & Objective

The Credo Multi-Asset Portfolios provide investors with diversified exposure to global assets through mutual funds and ETFs. The portfolios apply an evidence-based investment philosophy across asset classes with the aim of providing long term exposure to both traditional and alternative assets. The 45/55 portfolio targets a 45% long term allocation to equities and 55% in all other asset classes – the actual portfolio allocation at any point in time will fluctuate to reflect prevailing investment opportunities.

ESG Approach

The ESG range will prioritise consistency with the Credo MAP philosophy. ESG aware strategies that are deemed to be a suitable substitute for the unconstrained exposures in core MAP are included in MAP ESG. The wide-ranging and subjective nature of ESG investing leads to significant variation in ESG assessment - in line with MAP's focus on diversification, MAP ESG looks to diversify idiosyncratic risks between ESG assessors where appropriate.

Portfolio Performance (GBP)¹

Weighted Average Carbon Intensity²

Market Commentary

After an intense first quarter of the year, April brought some positive economic news for investors. The recent banking turmoil had raised concerns of a wider systematic contagion, but the US's largest banks reported better-than-expected earnings, partially restoring confidence in the market. The S&P 500, Euro STOXX 50 and FTSE 100 all finished the month up 1.6%, 1.8% and 3.4% respectively, measured in their local currencies, which was propelled by strong performances from stocks in the energy and healthcare sectors. In the bond markets, yields on US, UK, and German 10-year bonds saw mixed movements over the month, with US yields declining by 4.6 basis points, while UK and German yields rose by 22.9 and 2.1 basis points, respectively. Among commodities, Brent crude oil and gold both saw positive returns of 1.1% and 1.0%, respectively, while copper saw a decline of 4.7%. The pound rose by 1.9% against the US dollar and 0.3% against the euro.
