

## CORE STRATEGY & OBJECTIVE

The Credo Multi-Asset Portfolios provide investors with diversified exposure to global assets through mutual funds and ETFs. The portfolios apply an evidence-based investment philosophy across asset classes with the aim of providing long term exposure to both traditional and alternative assets. The 60/40 portfolio targets a 60% long term allocation to equities and 40% in all other asset classes – the actual portfolio allocation at any point in time will fluctuate to reflect prevailing investment opportunities.

## ESG APPROACH

The ESG range will prioritise consistency with the Credo MAP philosophy. ESG aware strategies that are deemed to be a suitable substitute for the unconstrained exposures in core MAP are included in MAP ESG. The wide-ranging and subjective nature of ESG investing leads to significant variation in ESG assessment - in line with MAP's focus on diversification, MAP ESG looks to diversify idiosyncratic risks between ESG assessors where appropriate.

<b>Relative</b>	-3.2	-0.9	-0.4	-5.6	2.2	-3.9

## MARKET COMMENTARY

May saw strong returns across global equity markets. In the US, equity markets rallied following the 90-day suspension of reciprocal tariffs between the US and China. The S&P 500, NASDAQ, and FTSE 100 all rose 6.3%, 9.6%, and 3.8% respectively, and measured in their local currencies. Earlier gains in the month were tapered following US President Trump's announcement that 50% tariffs would be applied on EU imports, which briefly reversed the market momentum. However, the subsequent reversal of the policy restored confidence, evidenced by the Euro STOXX 50 ending the month up by 5.4%, measured in its local currency. In fixed income, UK and US 10-year bond yields rose by 21 and 24 basis points, respectively, reflecting the elevated long-term risk premiums amid ongoing fiscal and inflationary uncertainty. Gold declined by 0.6%, while Brent Crude oil rose by 3.3% owing to both increased demand and disruptions to supply. As currency markets continued to digest the uncertainty surrounding tariffs, the pound extended its rally against the US dollar, appreciating by 0.8%. Further, the pound managed to claw back some of the prior month's losses against the euro, appreciating by 0.9%.
