UK based wealth management services firm Credo Capital has enhanced its wealth platform to provide offshore custody from Jersey, Channel Islands.

Currently, Credo provides wealth platform services to wealth managers, financial advisory firms and family offices in the UK and South Africa.

The enhanced service is in response to demand from existing clients who are expanding beyond their local markets, as well the opportunity to provide services to new clients in new jurisdictions, said the firm. The offshore custody solution allows clients access to global multi-asset class investments and multi-currency trading to a segregated custody service, all available via Credo's single integrated platform.

Credo provides global wealth management services to over 20 financial intermediaries and over 6,900 investors with more than £2.9 billion of assets under custody.
