## WHAT IS THIS PRODUCT?

Type : The product is an open-ended Irish Collective Asset-management Vehicle (ICAV) Fund with segregated liability between Sub-Funds authorised as an undertaking for collective investment in transferable securities (UCITS).

Term : This product has no maturity date. However, the Board of Directors may decide to close the product under certain circumstances.

Objectives : The investment objective of the Sub-Fund is to generate sustainable excess returns versus global equity market indices through an actively managed portfolio of equities from issuers across global markets. There can be no assurance that the Sub-Fund will achieve its investment objective. The Sub-Fund will seek to achieve its investment objective by investing in:

- A broad and diversified range of global equities which the Investment Manager believes to be well positioned to outperform the wider equity market over the longer term.
- The Sub-Fund will have a particular focus on securities of companies that are listed or traded on recognised, developed markets on a global basis.
- Business sectors that the Investment Manager may invest in include, but are not limited to, financial, consumer discretionary, healthcare, technology, consumer staples, communications, utilities, industrials, and businesses involved in the discovery, development and processing of raw materials.
- There will be no specific focus on industry sector or geographic region.
- The Sub-Fund may hold up to 50% of the NAV of the Sub-Fund in cash and including, for the avoidance of doubt, Money Market Instruments.

The Sub-Fund launched on 03 July 2017. The Share Class launched on 03 July 2017.

The currency of the Sub-Fund is USD, the currency of this product is USD.

Distribution Policy: As the Investor holds accumulation shares, income from investments in the Sub-Fund will be rolled up into the value of the shares.

Intended retail investor : The Sub-fund is suitable for Retail Investors. A typical investor in the Sub-Fund may be an investor with a high-risk tolerance and with an investment horizon of 5 years or longer who considers investment in the Sub-Fund as a convenient way of seeking to generate attractive risk adjusted returns through an exposure to global equities, debt instruments and collective investment schemes.

Depository: Société Générale Securities Services, SGSS (Ireland) Limited.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Investors shall note that besides the risks included in the risk indicator, other risks such as liquidity, counterparty, currency, credit risk, fixed interest securities risk and equity investment risk may affect the Sub-Fund's performance.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period (RHP): 5 years Example investment: 10,000 USD			
Scenarios		If you exit after 1 year	If you exit after 5 years (RHP)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,796 USD	1,706 USD
	Average return each year	-82.04%	-29.79%
Unfavourable	What you might get back after costs	8,395 USD	9,148 USD
	Average return each year	-16.05%	-1.76%
Moderate	What you might get back after costs	10,779 USD	15,036 USD
	Average return each year	7.79%	8.50%
Favourable	What you might get back after costs	16,236 USD	19,099 USD
	Average return each year	62.36%	13.82%

Unfavourable scenario: This type of scenario occurred for an investment between May 2021 and December 2022.

Moderate scenario: This type of scenario occurred for an investment between March 2013 and March 2018.

Favourable scenario: This type of scenario occurred for an investment between May 2016 and May 2021.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

## WHAT HAPPENS IF FUNDROCK MANAGEMENT COMPANY S.A. IS UNABLE TO PAY OUT ?

The Management Company is responsible for administration and management of the Sub-Fund, and does not typically hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

## WHAT ARE THE COSTS?

### Cost over time

The tables below show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 USD is invested

Example investment: 10,000 USD	If you exit after 1 year	If you exit after 5 years (RHP)
Total costs	106 USD	811 USD
Annual cost impact(*)	1.06%	1.15%

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.65% before costs and 8.50% after costs.

## Composition of costs
