

The Credo Platform offers both Onshore (UK) and Offshore (Channel Islands) custody options to give you flexibility to support different Investors according to their specific needs and circumstances. As such, we thought it would be useful to create a guide that helps explain some of the things to consider when you are choosing where Investor assets are held.

Please find the new [Onshore vs Offshore Custody](#) solutions document in InfoHub for more details.

If you have any further questions about Credo's offshore custody capabilities, then please contact your Relationship Manager for more information.
